HOMEWORK POLICY

RATIONALE

The current evidence and research shows that the quality of homework assigned is likely to be more important than the quantity. Overall, the effectiveness of homework is enhanced by providing students with choices among homework tasks, which will result in higher motivational and performance outcomes, students' autonomy, and intrinsic motivation (Patall et al., 2010).

Homework helps students by:

- complementing and reinforcing classroom learning
- fostering good lifelong learning and study habits
- providing an opportunity for students to become responsible for their own learning
- developing self-regulation processes such as goal-setting, self-reflection and time management
- supporting partnerships with parents by connecting families with the learning of their children.

PURPOSE OF THE POLICY

Homework provides students with opportunities to practice skills, review content and deepen understanding of concepts learned. Homework is seen as one way of supporting and fostering life-long learning and connecting families with the learning of their children.

Homework is recommended. There are benefits from daily reading and spelling practice. This forms the basis of our school's homework.
